Subject: 31 Bolinas/Electrical Shut Down

Hi Mark,

So our electric group is working towards installing all the electric related cable and equipment in advance of energizing the new transformer and service to 31 Bolinas. I have this scheduled for Wednesday night-Thursday morning, March 16-17. I wanted to make sure with the city that a night time shut down can occur rather than during the daytime which should be the least impactful to the commercial. Power will be restored the morning of St. Patrick's day to allow for all the revelers to enjoy their green beers first thing in the morning.

Brad,

I know I gave you the impression that we would have the new service hotted up this week. However scheduling restraints due to the outage has pushed this activity out to March 16th.

Thanks,

David Brown
